Fields

In this time of global economic crisis, through parallel markets some companies are being drawn out from their great depression.

Yes, Some individuals are bestowed with the unique ability of performing unprecedented drama in the name of politics. Their acts do not cease to astonish us from time to time. Dr. Brihanu Nega and the company he has been forming to collect US\$500 from gullible and honest Ethiopians living in Europe and North American is the case in point. Some of the major “objectives” of this company known as **GINBOT 7** are

- To unseat the government of Ethiopia through armed struggle,
- Rising fund amounting to one million US dollar by selling tickets known as “Identity for Patriot” which prices are US\$ 500 each for the armed struggle,
- Those contributors will be guest of honours in Ethiopia perhaps at Abiyot Adebabay or Meskel Square after the government of Ethiopia is toppled through that armed struggle,
- The time framework for unseating the government is six months, if not less,
- The fund is to be in the account by the end of January 2009 so that the armed struggle will ensue as far as possible,
- If the contributed money is short of achieving the objective more fund raising will continue,
- The armed struggle will be conducted at “minimum cost not to create national havoc” with at most care and meticulously,
- The new government will dismantle all current administrative structures, the national armed force, police and all security apparatus of the nation to be replaced by “new ones”,

- Everyone in the Diaspora is strongly urged to buy the “**Certificate of Heroism**” before the sales time is up,
- Apart from this the major CEO’s of this company, local CEO’s telephone numbers are available on the website of the company,
- Local CEO’s are in Belgium, UK, Switzerland, Sweden, Norway, USA, Denmark and etc.

Imagine! Imagine how petty it is to reduce the essence of patriotism to the level of US\$ 500 and Ethiopia is on the sale to pocket the known gambler Andargachew Tsigie and coward Berhanu Nega. How come a guy who runs away from the then legitimate armed struggle in his 30,s is audacious to propagate for it in his late 50,s?

Look how much they have underestimated the intelligence of Ethiopians in the Diaspora when they introduced a day light robbery in the name of love for a country.

Both Tsigie and Nega perhaps did not have a significant of a share of money embezzled by X-kill and Y-kiss people so that they came out with this design of again looking the gullible Diaspora to take their share now.

The advertisement is packaged in an excellent manner so that the new company may soon enrich itself under the “ቁጥጥር በሉ, Quch Belu” motto of lying.

But at last I would like to say regarding this issue is that you (Tsigie and Nega) are right because it is free market economic system. We (the Diaspora) also paid so much for so many times now and so far only to sponsor to the comfortable life of some in the complex and complicated life in USA. But now we are very sorry and thank you we will not do it again.
