

Message of Condolences

From coordinating committee of Tigrians Science and Academic Network (TSAN)

It was with deep sorrow, shock, deep sadness and heartfelt grief that we members of the Tigrians Science and Academic Network learnt the news of the untimely and unexpected passing away of our most respected, beloved and exalted Prime Minister, his Excellence Meles Zenawi. Our Prime Minister was such a very far-sighted, visionary, brilliant, dedicated leader who above all had great love and concrete vision for his country, Ethiopia, and his people, Ethiopians.

Prime Minister Meles Zenawi has contributed a lot to our country and continent more than expected and has inspired and created millions of **MELESAWUYAN**, especially for us, the young generation. Today Meles's vision, determination, commitment etc are in the mind of every Ethiopian. We, the Ethiopian youngsters, will always be proud of him and we will be determined and committed more than any time to take his visions and all his noble works to its final stage.

Despite the great loss that our country, continent and our people has suffered by the loss of our prestigious Prime Minister Meles Zenawi, we the young generation will be more strong and determined than ever to stand with our government and pay all what is expected from us to facilitate and become actors so as to take all his splendid ideas, visions, plans, works to their destination.

We, members of the TSAN would like to express our deep condolences to our Ethiopian people and to the bereaved family of our great leader, Prime Minister Meles Zenawi and along with this, we would like once again to confirm that, we the young Ethiopians, will take the promise of our great leader seriously and will work day and night to make his dreams realistic.
