Tel. 0921258688

Telex. _____

Fax No. _____

Date: 13/05/06

Card No 280834

I. Identification

Patient Name: Gebrelibanos Gebretsadik

Age: 21 **Sex:** M **Address:** _____

II. Brief Medical History: This young man presented to our hospital in the month of November 2013 with symptoms of anemia and a bleeding tendency of 3 months duration. He didn't have constitutional symptoms or bone pain.

III. Physical Findings: Were remarkable for pallor and petechiae on the proximal part of the limbs and trunk.

III. Investigation Results at Presentation:

WBC: 2,160/ μ L (Neutros: 22%, Lymphs: 65%), Hgb: 4.0 g/dL, Platelets: 10.000/ μ L
Bone marrow aspiration was diluted and not diagnostic; Bone marrow biopsy suggestive of Aplastic Anemia. Other studies were normal.

V. Diagnosis: Severe Aplastic Anemia

VI. Treatment Results: Supporting care with packed red cell and platelet concentrate transfusion.

VII. Reasons for Referral Abroad: For possible Immunosuppressive Treatment or Stem Cell Transplantation.
