To whom it may Concern

Dear donor,

Adwa and Surrounding Development Association is a Texas based non profit organization. Its purpose is to support the ongoing developmental activities for a sustainable end of poverty in the Eastern Africa, Ethiopia. Recently our organization has donated Suction machines, Oxygen concentrators, and Pulseoximeters to Adwa Hospital, Ethiopia. This was made possible with the help of philanthropists and generous people and institutions like you.

The Hospital is hardly serving thousands of patients with a very limited recourses and few trained man power. They need medical equipment and professional help. Therefore we earnestly request your generosity to respond their chalenges. Similarly, the hospital appreciates professionals to visit them and share experiences. We need any kind of help to improve the health of thousands of people who are desperately looking for it.

The equipment will tackle many challenges by providing quality health care and saving many lives at risk due to the lack of fundamental medical tools. Would you help us further our efforts with used or new medical equipment? If needed, as a registered 501 (c)(3) charity, we will provide you the necessary documents for your Tax purpose. We will update you on how your donation improves their health care.

You may contact the Hospital for further information.

Thank you in advance. We appreciate your support.

Sincerely,

We can be contacted via our email address:
